linkedin.com/in/rohith612, github.com/rohith612

SUMMARY

Experienced Web Developer with extensive expertise in **PHP** frameworks like **Laravel** and **CodeIgniter**. Proven track record in delivering scalable web applications, improving user interfaces, and optimizing **MySQL** databases. Adept at collaborating with cross-functional teams to drive project success.

WORK EXPERIENCE   (6+ Years Overall)

Sr. Laravel Developer, Reviewbit   (Apr 2022 - Mar 2024)

- Architected and delivered a high-performance **Shopify** application that streamlined online sales for over **1,000** merchants.
- Led the backend development for a review collecting application using a **WhatsApp** chatbot, tailored for offline merchants.
- Implemented a **Stripe**-powered payment service for internal organizational use, streamlining the payment process and improving financial operations.

Software Engineer, Netstager Technologies   (Mar 2018 - Jan 2020)

- Quickly mastered **Laravel** technology, contributing to increased team efficiency and project delivery speed.
- Spearheaded the development and revamp of multiple high-traffic websites, enhancing user experience and driving a 15% increase in client satisfaction.
- Architected and developed a customized **E-commerce** web application that resulted in a 25% increase in online sales for the client.

Software Engineer, Sandf Technologies   (May 2016 - Jan 2018)

- Trained extensively in **CodeIgniter**, **AngularJS**, and **MySQL**, building a strong foundation in web development.
- Contributed to the development of various minor websites, gaining hands-on experience in real-world applications as an intern in my first professional role.
